Subject Index

Absorption
Wastewater-Induced Soil Clogging Development, 166

Abutments
Lateral Earth Pressure on Retaining Structure with Anchor Plates, 404

Acceleration
Automated Data Acquisition System for Monitoring Cement Hydration, 93

Accelerograms
Correlation Analysis in Space-Time Modeling of Strong Ground Motion, 298

Accident data
Developing an Intersection Hazard Index, 835
PC-Based Traffic Accident Data Analysis Program, 849
Uncontrolled T Intersections: Who Should Yield?, 842

Accuracy
Position Tolerance in Land Surveying, 818
Precision in Cross-Sectional Area Calculations on Earthwork Determination, 817

Acid mine water
Treatment Requirements for Acid Drainage from Coal Storage Heaps, 145

Acid rain
Expected pH for Halving Sulfate in Adirondack Rain, 191

Acidic water
Lake Acidification Model: A Practical Tool, 187

Acoustics
Sound Structure, 1010

Acquisition
Common Critical Success Factors for Integrating Mergers and Acquisitions, 607
Owner-Furnished Equipment (OFE) Contract Practices, 59

Acre-foot
Alternative Metric Units for Acre-Foot and Acre-Inch, 584

Activated carbon
Adsorption of Synthetic Organic Shock Loadings, 212
Design of Rapid Fixed-Bed Adsorption Tests for Nonconstant Diffusivities, 144
Kinetics of Adsorption on Activated Carbon I: Single-Solute Systems, 178
Kinetics of Adsorption on Activated Carbon II: Multi-Solute Systems, 179
Kinetics of Adsorption on Activated Carbon III: Natural Organic Material, 180
Mathematical Modeling of Bioregeneration in GAC Columns, 129
Nitrification in Powdered-Activated Carbon-Activated Sludge Process, 211
Rate of Humic Substance Uptake During Activated Carbon Adsorption, 214

Activated carbon treatment
Biomass Determinations in Biophysical Treatment Systems, 155
Removal of Radon from Water Supplies, 12
Removal of Toxic Materials from In Situ Tar Sand Process Water, 392

Activated sludge
Activated Sludge-Chlorine Reactions During Bulking Control, 136
Effect of Slowly Biodegradable Organics on Kinetic Coefficients, 137
Transient Responses Incorporating Products Formation, 185

Activated sludge process
Biomass Determinations in Biophysical Treatment Systems, 155
Comprehensive Model of Activated Sludge Wastewater Treatment System, 189
Effect of Variable Influent Loading on Biological Phosphorus Removal, 197
Mechanism of Metal Removal in Activated Sludge, 198
Nitrification in Powdered-Activated Carbon-Activated Sludge Process, 211
Optimization Techniques for Secondary Wastewater Treatment System, 188
Rational Design of Aerobic Digestion Systems, 163

Active control
Active Control of Inelastic Structures, 278
Active Control of Nonlinear Oscillations in Bridges, 279
Design of Appendages for Tall Building Control, 661
Feasibility of Active Control of Tall Buildings Against Wind, 658
Time-Delay Effects on Actively Damped Structures, 369

Active structures
Active Structures, 791

Adhesive bonding
Fatigue Strength of Adhesively Bonded Cover Plates, 712

Adirondack Mountains
Expected pH for Halving Sulfate in Adirondack Rain, 191

Adjudication
ADR: Trial Lawyer's Perspective, 36

Admixtures
Evaluating Mix Designs for Cold Weather Concreting, 117
Sludge Ash as Filler for Portland Cement Concrete, 151

Adsorption
Adsorption Behavior of Cu(II) onto Sludge Par-

ticulate Surfaces, 147
Adsorption of Inorganic Pollutants in Aquatic Systems, 494
Adsorption of Synthetic Organic Shock Loadings, 212
Design of Rapid Fixed-Bed Adsorption Tests for Nonconstant Diffusivities, 144
Evaluating Multicomponent Competitive Adsorption in Fixed Beds, 216
Kinetics of Adsorption on Activated Carbon I: Single-Solute Systems, 178
Kinetics of Adsorption on Activated Carbon II: Multi-Solute Systems, 179
Kinetics of Adsorption on Activated Carbon III: Natural Organic Material, 180
Mathematical Modeling of Bioregeneration in GAC Columns, 129
Molecular Weight Effects on THM Control by Coagulation and Adsorption, 208
Nitrification in Powdered-Activated Carbon-Activated Sludge Process, 211
Prediction of Fixed-Bed Adsorber Removal of Organics in Unknown Mixtures, 162
Rate of Humic Substance Uptake During Activated Carbon Adsorption, 214
Removal of Cadmium from Water by Water Hyacinth, 152
Removal of Radon from Water Supplies, 12
Removal of Toxic Materials from In Situ Tar Sand Process Water, 392

Aeration
Aeration-Induced Circulation from Line Sources I: Channel Flows, 132
Aeration-Induced Circulation from Line Sources II: Dissolved Oxygen Variations, 133
Influence of Temperature on Oxygen Transfer, 175
Little Bubbles, Big Payoff, 1017
Sewers Get a Breath of Fresh Air, 1046
Study of Aeration at Weirs and Cascades, 131

Aerobic processes
Rational Design of Aerobic Digestion Systems, 163

Aerodynamics
Aerodynamic Devices for Tall Buildings and Structures, 280
Interpreting Aeroelastic Models of Cable-Stayed Bridges, 294
Mean Flow Characteristics of Redeveloping Flows, 533
Power Plant Wind Design Problems and Practices, 388
Twisting in the Wind, 1062
Two-Cylinder Model for Wind Vortex-Induced Vibration, 308
Use of Field Parameters in Wind Engineering Design, 733

Aeroelasticity
Interpreting Aeroelastic Models of Cable-Stayed Bridges, 294

Aesthetics
Aesthetic Design Method for Bridges, 739

Aggradation
Nonlinear Model for Aggradation in Alluvial Channels, 490

Aggregate
Nature of Fines Produced in Aggregate Processing, 115

Aggregate gradation
Rolled Concrete Dams Using Gap-Graded Aggregate, 42

Aggregates
Aggregate Interlock Role in R.C. Thin-Webbed Beams in Shear, 638
Effects of Stress History on Ballast Deformation, 446
Interface Element Modeling of Fracture in Aggregate Composites, 363
Rolled Concrete Dams Using Gap-Graded Aggregate, 42

Aging
Inversion of Aging Compliance Functions, 353

Agriculture
Water Duties: Arizona's Groundwater Management Approach, 882

Agronomics
Quality Requirements for Irrigation with Sewage Water, 593

Air classifiers
Particle Separation in Pulsed Airflow, 361

Air flow
Bulk Mixing Using Diffused Air in Circular and Rectangular Vessels, 127
Characteristics of Mechanically-Generated Waves, 933
Particle Separation in Pulsed Airflow, 361

Air pollution
Expected pH for Halving Sulfate in Adirondack Rain, 191
Source-Receptor Analysis of Volatile Hydrocarbons, 192

Air quality
Air Quality Planning: A General Chance-Constraint Model, 134
Environmental Planning in Urban Transportation, 836

Air quality standards
Environmental Engineering, 1112

Air traffic
Application of Expert Systems in Air Traffic Control, 830

Air transportation
Local Air Service and Economic Impact of Small Airports, 822

Airport access
Crunch Time for Airport Engineering, 997

Airport design
Planning by Database, 1023

Airport runways
Fast Exit, 1064
Using Soil Temperatures to Monitor Thermosyphon Performance, 124

Airport terminals
Crunch Time for Airport Engineering, 997
O'Hare's Showstopper Terminal, 1068

Airports
Crunch Time for Airport Engineering, 997
Environmental Planning in Urban Transportation, 836
Jet Fuel from the Ground Up, 985
Local Air Service and Economic Impact of Small Airports, 822
Test Fill at Chek Lap Kok, Hong Kong, 400

Air-stripping
Nomograph for Air Stripping of VOC from Water, 158

Alaska
Design/Construction Considerations for Subarctic Wastewater Plant, 123
National Needs in Arctic Research, 114

Algorithms
Expert System for Traffic Signal Setting Assistance, 828
Genetic Algorithms in Pipeline Optimization, 99
New Optimal Control Algorithms for Structural Control, 347

Alkalinity
Lake Acidification Model: A Practical Tool, 187

Alluvial channels
Critique of the Regime Theory for Alluvial Channels, 544
Nonlinear Model for Aggradation in Alluvial Channels, 490
Numerical Simulation of Degradation of Alluvial Channel Beds, 516
Streambank Protection by Submerged Vanes, 498
Unsteady Sediment-Transport Modeling, 472

Alluvial streams
Bed Topography and Sorting in Bends, 482

Anaerobic digestion
Improved Sludge Gasification by Two-Phase Anaerobic Digestion, 210

Analytical stereoplotters
From Mapping to Measuring With the Analytical Stereoplotter, 816

Analytical techniques
Analysis of Prismatic and Linearly Tapered Reinforced Concrete Columns, 673
ASM Solution of Stiffened Sector Plates, 375
Design of Large Steam Turbine-Generator Foundations, 1100
Stochastic Deconvolution of Earthquake Motions, 274

Anchor bolts
Strength of Epoxy-Grouted Anchor Bolts in Concrete, 794

Anchor plates
Lateral Earth Pressure on Retaining Structure with Anchor Plates, 404

Anchors
Foundations for Transmission Line Towers, 1117
Uplift of Anchor Plates in Sand, 405

Anemometers
Open-Channel Flow Measurements with a Laser Doppler Anemometer, 8

Anisotropic shells
Analysis of Laminated Anisotropic Shells of Revolution, 259

Anistropic plates
Model-Size Reduction for the Buckling and Vibration Analyses of Anistropic Panels, 267

Anistropic soils
Compression and Extension of K_o Normally Consolidated Kaolin Clay, 469

Anistropy
Creep of Anisotropic Clay: New Microplane Model, 326
Transitional Yielding Approach for Soils Under General Loading, 266

Antennas
Teleport: New Wave Engineering, 1050

Approximation methods
Analytical Solution of Simplified Surge Flow Equations, 600
Approximate Methods for Nonlinear Time-Variant Reliability Analysis, 376
Precision in Cross-Sectional Area Calculations on Earthwork Determination, 817
Second-Order Reliability Approximations, 336

Aquatic environment
Adsorption of Inorganic Pollutants in Aquatic Systems, 494

Aquatic plants
Removal of Cadmium from Water by Water Hyacinth, 152

Aqueducts
Interaction of Flow and Incrustation in the Roman Aqueduct of Nîmes, 479
Optimal Aqueduct Capacity and Distribution Policy: Continuous Approach, 914
Optimal Aqueduct Capacity and Distribution Policy: Discrete Approach, 915

Aquifers
Efficient Aquifer Simulation in Complex Systems, 884
Microcomputer-Based Interactive Aquifer Simulator, 500
Optimization Model for Groundwater Management in Multi-Aquifer Systems, 894
Strategy for Managing Depleted Aquifers, 903
Subsurface Seawater Intrusion Barrier Analysis, 513

Arbitration
ADR: Trial Lawyer's Perspective, 36
Arbitration: A Look at Its Form and Performance, 67
Mediation/Arbitration: Alternative Dispute Resolution Process, 31

Archeology
Interaction of Flow and Incrustation in the Roman Aqueduct of Nîmes, 479

Arches

Element Stiffness of Circular Member, 691
Flexural-Torsional Buckling of Arches, 693
Flexural-Torsional Buckling of Monosymmetric Arches, 776
Flexural-Torsional Buckling Tests on Arches, 724

Architecture
Engineering a Corporate Statement, 1072

Arctic regions
National Needs in Arctic Research, 114
Sea-Ice Indentation in Creeping Mode, 321

Arid lands
Evapotranspiration Estimates in Extremely Arid Areas, 596
Flood Frequency Estimates in Southeastern Arizona, 590
Wastewater Criteria for Irrigation in Arid Regions, 569

Arizona
Flood Frequency Estimates in Southeastern Arizona, 590
Irrigation Effects in Arizona and New Mexico, 557
Role of Government Civil Engineers in Phoenix, Arizona, 246
Water Duties: Arizona's Groundwater Management Approach, 882

Armor units
Hydraulic Stability Analysis of Armor Units, 940

ASCE Activities
Practitioner-Educator Interface of Certain Professional Societies, 621

ASCE Education
Continuing Education—A Look to the Future, 218

ASCE Ethics
Engineers, Ethics, and Nuclear Weapons, 243

ASCE Outstanding Civil Engineering
The Briny Deep Comes Ashore, 1032
Liberty Restored, 1030
Lights Out at Caribou, 1031
Top Projects of 1987, 1033

ASCE Publications
Failure Information: Dissemination Strategies, 17
Viewpoint from NSPE/PEPP on Revising Manual 45, 233

Ashes
Sludge Ash as Filler for Portland Cement Concrete, 151

Asphalt
Evaluating Asphalt Cap Effectiveness at Superfund Site, 172

Asphalt mix design
Construction of Rubber-Modified Asphalt Pavements, 80

Asphalt pavements
Concrete Overlays Challenge Asphalt, 998
Construction of Rubber-Modified Asphalt Pavements, 80

Asymptotic series
Wave Transmission Through Submerged Apertures, 967

Attenuation
Graphic Estimation of Peak Flow Reduction in Reservoirs, 548

Automation
Automation's Impact on Engineering Design Progress, 630
Computers Board Equipment, 972
Planning, Operation, Rehabilitation and Automation of Irrigation Water Delivery Systems, 1132

Automobile usage
Public Use of Autos: Mobility Enterprise Project, 825

Automobiles
Flexible Pavement Strains Caused by Auto Tires, 855

Auto-regressive models
Water Quality Data Analysis in Chung Kang River, 140

Auto-regressive moving-average model
ARMA Model for Two-Dimensional Processes, 272

Axial compression
Ring-Stiffened Cylinders Under Interactive Loading, 759
Strain Space Approach for Softening Plasticity, 270

Axial forces
Bending of Interstice Walls in Circular Silos, 778
Effect of External Pressure on Strength of Short Tubular Members, 744
Reinforced Concrete Beams Subjected to Bending and Torsion, 655

Axial loads
Axially Loaded Piles in Layered Soil, 414
Axially Loaded Sandwich Panels, 786
Formulation of Inelastic Bar Under Repeated Axial and Thermal Loadings, 365
Hysteretic Dissipation of Piles Under Cyclic Axial Load, 412
Load-Deformation Response of Axially Loaded Piles, 470
Load-Settlement Relation for Axially Loaded Piles, 433
Strength of Axially Loaded Orthotropic Plates, 656

Axisymmetry
A Thermoplastic BEM Analysis for Substructured Axisymmetric Bodies, 379

Azimuth
Alternative Geometric Determination of Altazimuthal-Distance Covariance Matrices, 809

Backfills
Behavior and Design of Buried Very Flexible Plastic Pipes, 865
E' and Its Variation With Depth, 859
Open Hearth Slag—A Problem Waiting to Happen, 24

Backwashing
Comparison of Backwash Models for Granular Media, 165
Expansion of Granular Filters During Backwashing, 164

Shape Factor and Degree of Packing in Fluidization, 149

Bacteria

Bacterial Die-Off in Waste Stabilization Ponds, 153

Effect of Pond depth on Bacterial Die-Off, 215

Baffles

Modeling Stratified Flow in Combined Sewer Overflow, 483

Bank erosion

Streambank Protection by Submerged Vanes, 498

Barriers

Designing Noise Barriers Using Expert System CHINA, 829

Subsurface Seawater Intrusion Barrier Analysis, 513

Bars

Formulation of Inelastic Bar Under Repeated Axial and Thermal Loadings, 365

Free Vibrations of Thin-Walled Bars with Open Cross Sections, 351

Two Efficient Approaches for the Elastica Problem of Nonlinear Elastic Bars, 307

Variational Scheme for Analysis of Torsion of Embedded Nonuniform Elastic Bars, 357

Base course

The Road to Drained Pavements, 995

Battered piles

Three-Dimensional Analysis of Pile Groups, 432

Beach erosion

Analytical Solution for Dune Erosion by Storms, 953

Offshore Breakwaters in Laboratory and Field, 936

Restoring the Shore, 1058

Beach nourishment

Restoring the Shore, 1058

Beaches

Coastal Sediments '87, 1094

Beam

Unified Approach for Beams on Elastic Foundations Under Moving Loads, 443

Beam columns

C_m Factor in Load and Resistance Factor Design, 743

Inelastic Lateral Buckling of Beam-Columns, 789

Local and Overall Buckling in Thin-Walled Beams and Columns, 685

Local Buckling and Sectional Behavior of Fabricated Tubes, 669

Nonlinear Finite Element Analysis of Angle and Tee Beam-Columns, 682

Beams

Beam and Column Buckling Under Directed Loading, 713

Beams on Variable Two-Parameter Elastic Foundation, 352

Bridge Design By 1-2-3, 992

Cyclic Torsion Tests on Reinforced Concrete Beams, 718

Direct Design of Non-Prismatic Prestressed Beams —I, 707

Direct Design of Nonprismatic Prestressed Beams —II, 708

Ductility, Snapback, Size Effect, and Redistribution in Softening Beams or Frames, 793

Dynamic Responses of Multispan Nonuniform Beam Due to Moving Loads, 665

Identification of Running Load and Beam System, 310

Large Displacement Analysis for Pure Bending of Thin-Walled Beams, 291

Reinforced Concrete Beams Subjected to Bending and Torsion, 655

Shear Deformation Mode of Reinforced Concrete Beam, 680

Size Effect in Torsional Failure of Concrete Beams, 766

Softening in Reinforced Concrete Beams and Frames, 792

Stability of Beams with Tapered I-Sections, 345

Stability of C-Shaped Spring, 319

Tapered Beam and Column Elements in Unbraced Frame Structures, 92

Torsional Strength of R/C Beams Containing Rectangular Openings, 788

Validity of Distortion-Energy-Based Strength Criterion for Timber Members, 800

Vibrating Beam Partially Embedded in Winkler-Type Foundation, 265

Warping Effects in Transverse Bending of Thin-Walled Beams, 317

Beams, supports

Beam on a Tensionless Elastic Foundation, 293

Beams with Small Rectangular Opening Under Torsion, Bending, and Shear, 775

Bearing capacity

Axially Loaded Sandwich Panels, 786

Inclination Factors for Bearing Capacity of Shallow Footings, 451

Inclination Factors for Strip Footings, 425

Strain Path Method, 6

Uncertainties in Evaluation of Strength of Marine Sand, 436

Bearing design

Steel Boxes Carry Rail Lines, 1001

Bearings

Earthquakes Will Not Damage This Bridge, 1052

Equivalent Homogeneous FE Model for Elastomeric Bearings, 263

Steel Boxes Carry Rail Lines, 1001

Bed load

Analysis of Bed-Load Motion at High Shear Stress, 478

Bedload Transport in Gravel-Bed Streams, 485

Influence of Channel Width on Bed Load Transport Capacity, 550

Laminar Einstein Bed Load Transport Equation for Overland Sheet Flow, 552

Bed load movement

Measures of Flow Intensity as Predictors of Bed Load, 546

Transport of Bed Sediment in Clay Suspensions, 529

Bed material
Bed Topography and Sorting in Bends, 482

Bedforms
Sediment Convection-Diffusion and Bedform Length, 545

Bending
Axially Loaded Sandwich Panels, 786
Beams with Small Rectangular Opening Under Torsion, Bending, and Shear, 775
Energy Analysis of Double-Plane Cable-Stayed Bridges, 770
Finite Difference Solutions of Reissner's Plate Equations, 258
Large Displacement Analysis for Pure Bending of Thin-Walled Beams, 291
Resistance Factor for Wood in Bending or Tension, 704

Bending moments
Bending of Interstice Walls in Circular Silos, 778
Effect of External Pressure on Strength of Short Tubular Members, 744
Intensity of Corner in Fixed Edge of Thin Plate, 331

Berms
Breakwater Breakthrough—Bold New Breakwaters, 971

Biaxial bending
Biaxial Seismic Response of R/C Frames, 714
Concrete Sections Under Biaxial Bending, 767
Expert Interactive Design of R/C Columns Under Biaxial Bending, 95
Reinforced Concrete Beams Subjected to Bending and Torsion, 655

Biaxial loads
Biaxial Seismic Response of R/C Frames, 714
Biaxially Loaded L-Shaped Reinforced Concrete Columns, 11
Stress-Strain Relation for Coated Fabrics, 364

Bids
Optimum Markup by Direct Solution, 49

Bifurcations
Compound Buckling of Elastically Supported Struts, 378

Biharmonic equations
Deducing General Solutions of Navier's Elastostatic and Dynamic Equations, 286

Bioassay
Potassium Ferrioxalate as Chemical Actinometer in Ultraviolet Reactors, 170

Biochemical oxygen demand
Effect of Slowly Biodegradable Organics on Kinetic Coefficients, 137

Biodegradation
Biofilm Shearing under Dynamic Conditions, 160
Effect of Slowly Biodegradable Organics on Kinetic Coefficients, 137
Mathematical Modeling of Bioregeneration in GAC Columns, 129

Biofilm
Biofilm Shearing under Dynamic Conditions, 160
Unsteady-State Biofilm Kinetics, 157

Biological treatment
Calculation of Effectiveness Factors in Spherical Shells, 203
Effect of Variable Influent Loading on Biological Phosphorus Removal, 197

Biomass
Biomass Determinations in Biophysical Treatment Systems, 155

Blast loads
Dynamics of Structures, 1105

Bluffs
Recession Rate of Glacial Till Bluffs, 934

Bolts
Fatigue Strength of Bolted Joints, 749
Reliability of Bolted Steel Tension Members, 751

Bond stress
Finite Element Models for Bond Problems, 769
Local Concrete-Steel Bond Behavior at Low Temperature, 790

Border irrigation
Analytical Solution of Simplified Surge Flow Equations, 600
Surface Irrigation Nonlinear Optimization Models, 583

Bored piles
New Deep Foundations Cut Costs, 1082

Boreholes
Shear Strength of Prestressed Cohesive Soils, 403
Stopping Seepage, 989

Boring
Unearthing Mt. Baker Tunnel, 7

Boston
Boston's Water Resource Development: Past, Present, and Future, 1090

Boundaries, properties
Technical Standards for Boundary Surveys Developing Model Law, 813

Boundary conditions
Buckling and Postbuckling of Heavy Columns, 337
Finite Difference Solutions of Reissner's Plate Equations, 258
Generalized Nonuniform Torsion of Beams and Frames, 745
Traction Boundary Conditions for Shell Elements, 264
Trefftz's Method for Vibration of Rigid Plate, 315

Boundary element method
Boundary Element Method in Drawdown Seepage Analysis for Earth Dams, 96
Boundary Integral Equation Method for Limit Surface Gravity Waves, 950
Green's Function Implementation for Pile Analysis, 296
Horizontal Stiffness of Arbitrarily Shaped Embedded Foundations, 418
New Axisymmetric BEM Formulation for Body Forces Using Particular Integrals, 301
New Boundary Element Formulation for 2-D

Elastoplastic Analysis, 273
Nonlinear Antiplane Response of Rigid Inclusion to Incident Stress Wave, 359
A Thermoplastic BEM Analysis for Substructured Axisymmetric Bodies, 379

Boundary layer
Advances in Physical Modeling for Wind Engineering, 305
Turbulence Modeling for Gust Loading, 732

Boundary layer flow
Mean Flow Characteristics of Redeveloping Flows, 533

Boundary shear
Lower-Bound Collapse Load of Square Footing, 752

Boundary value problems
Intensity of Corner in Fixed Edge of Thin Plate, 331
Intensity of Corner in Fixed Edge of Plane Problem, 335

Bounding surface
Numerical Implementation of Plasticity Model for Cohesive Soils, 290
Simple Experimentally Motivated Cyclic Plasticity Model, 282

Box columns
Experimental Study of Thin-Walled Steel Box Columns, 772
Strength of Thin-Walled Square Steel Box Columns, 688

Box girders
Negative Shear Lag in Cantilever Box Girder with Constant Depth, 639

Bracing
Save the Walls, 1055
Seismic Testing of Full-Scale Steel Building—Part I, 780
Seismic Testing of Full-Scale Steel Building—Part II, 781

Breaking waves
Laboratory Study of Steep and Breaking Deep Water Waves, 958
Spectrum of Breaking Waves in Deep Water, 276

Breakwaters
Breakwater Gap Wave Diffraction: An Experimental and Numerical Study, 931
Computer Aided Simulation of Fluid-Structure Interaction Problems, 1096
Cost-Effectiveness of Breakwater Cross Sections, 955
Defending Our Lake Shores, 1005
Offshore Breakwaters in Laboratory and Field, 936
Simplified Methods to Calculate Wave Loadings on Vertical Wall Breakwater, 966
Wave Transmission Through Submerged Apertures, 967

Brick masonry
Application and Performance of Structural Materials and Exterior Facades, 1089
Rehab Roundup, 1051

Bricks
Bricks Manufactured from Sludge, 146
Reinforcement of Brick Walls Spanning Vertically, 657

Bridge abutments
Surveying for Scour, 1075

Bridge construction
Bridge Engineering Training Course for Indonesian Engineers, 255

Bridge decks
Experimental Assessment of Performance of Bridges, 1113
Field Performance of Deep Polymer Impregnation, 819
Static and Dynamic Tests of Concrete Bridge, 642

Bridge design
Aesthetic Design Method for Bridges, 739
Automating Bridge Design, 1027
Bridge Design By 1-2-3, 992
Bridge Engineering Training Course for Indonesian Engineers, 255
Bridges and Transmission Line Structures, 1091
Design of Triangular Cross-Section Bridge Truss, 796
The Just-in-Case Factor, 1060
Twisting in the Wind, 1062

Bridge failure
The Scourge of Scour, 1036

Bridge inspection
Bridge Analysis and Rating with Microcomputers, 846
Comparative Performance of Timber Bridges, 727
The Wet Look, 1054

Bridge loads
Experimental Assessment of Performance of Bridges, 1113

Bridge maintenance
Golden Gate Bridge Improvements, 1008

Bridges
Active Control of Nonlinear Oscillations in Bridges, 279
Bridges and Transmission Line Structures, 1091
Connecticut: A Success Story, 1053
Effects of Damage and Redundancy on Structural Reliability, 731
Equivalent Homogeneous FE Model for Elastomeric Bearings, 263
Historic Bridges: Conflict Ahead, 1012
Passive Control of Nonlinear Oscillations in Bridges, 368
Research on Transportation Facilities in Cold Regions, 1135

Bridges, arch
Considerations for the Design of Network Arches, 771
Elastic Stability of Deck-Type Arch Bridges, 684

Bridges, box girder
Bridge Vibrations Due to Vehicle Moving Over Rough Surface, 760
Building Bridges the Old Way, 975

Shear Lag Effect and Uncertainty in Concrete Box Girder Creep, 672
Spanning the Seas, 1013
Steel Boxes Carry Rail Lines, 1001

Bridges, cable-stayed
Energy Analysis of Double-Plane Cable-Stayed Bridges, 770
Interpreting Aeroelastic Models of Cable-Stayed Bridges, 294

Bridges, composite
Temperature Distribution in Composite Bridges, 666

Bridges, concrete
Building Bridges the Old Way, 975
Static and Dynamic Tests of Concrete Bridge, 642

Bridges, girder
Bridge Analysis and Rating with Microcomputers, 846
Fatigue Strength of Adhesively Bonded Cover Plates, 712

Bridges, highway
Reliability Calibration of a Bridge Design Code, 3
Risk Analysis of Fatigue Failure of Highway Steel Bridges, 667

Bridges, long span
Spanning the Seas, 1013
Torsional Response of Long Span Bridges in Presence of Turbulence, 277

Bridges, piers
Surveying for Scour, 1075

Bridges, steel
Risk Analysis of Fatigue Failure of Highway Steel Bridges, 667

Bridges, suspension
Control of Flutter in Bridges, 304
Safety Margins of Suspension Bridges Under Seismic Conditions, 735

Bridges, truss
Bridge Analysis and Rating with Microcomputers, 846
Considerations for the Design of Network Arches, 771
Design of Triangular Cross-Section Bridge Truss, 796

Bridges, wooden
Comparative Performance of Timber Bridges, 727

Broad-crested weir
Flow Past Wall-Mounted Rectangular and Round-Nosed Rectangular Bodies, 362

Bubbles
Little Bubbles, Big Payoff, 1017

Buckling
Approximate Formfulas for Buckling of Heavy Column with End Load, 779
Axially Loaded Sandwich Panels, 786
Beam and Column Buckling Under Directed Loading, 713
Beam on a Tensionless Elastic Foundation, 293
Buckling Theory of Sheathed Walls: Linear Analysis, 761
Compound Buckling of Elastically Supported Struts, 378
Distortional Buckling Formulas for Channel Columns, 703
Effect of Curvature on Stability of Curved Beams, 709
Elastic Stability of Deck-Type Arch Bridges, 684
Experimental Study of Thin-Walled Steel Box Columns, 772
Flexural-Torsional Buckling of Arches, 693
Flexural-Torsional Buckling of Monosymmetric Arches, 776
Flexural-Torsional Buckling Tests on Arches, 724
Improved G-Factor Method for Evaluating Effective Lengths of Columns, 719
Inelastic Buckling of Nonprismatic Columns, 338
Inelastic Buckling of Welded Monosymmetric I-Beams, 683
Inelastic Lateral Buckling of Beam-Columns, 789
Local and Overall Buckling in Thin-Walled Beams and Columns, 685
Local Buckling and Sectional Behavior of Fabricated Tubes, 669
Local Buckling Interaction in Cold-Formed Columns, 675
Model-Size Reduction for the Buckling and Vibration Analyses of Anistropic Panels, 267
Noninteger-Polynomial Finite-Element Analysis, 692
Optimum Location of an Interior Hinge on a Column, 648
Plastic Buckling of Plates with Edge Frictional Shear Effects, 320
Static/Dynamic Analysis of Locally Buckled Frames, 659
Strength of Thin-Walled Square Steel Box Columns, 688

Budgets
Adequate Budget for Project Resource Management, 635

Building codes
Building Structures, 1092
Design and Construction Error Effects on Structural Reliability, 662
Reliability of Bolted Steel Tension Members, 751
Reliability-Based Code Formulations for Reinforced Concrete Buildings, 774
A Safer Earthquake Design Approach, 1009

Building design
Building Structures, 1092

Building frames
Building Frame Analysis in Basic, 1029
A Safer Earthquake Design Approach, 1009
Safety of Type 2 Steel Frames, 725
Safety of Type 2 Steel Frames Under Load Cycles, 726
Seismic Resistance of R/C Exterior Connections with a Floor Slab, 750

Buildings
Experimental Glass Failure Data and Equivalent One-Minute Loads, 802

Parametric Study of Earthquake-Resistant Coupled Walls, 647
Seismic Testing of Full-Scale Steel Building—Part I, 780
Seismic Testing of Full-Scale Steel Building—Part II, 781

Buildings, office
Engineering a Corporate Statement, 1072
Rehab Roundup, 1051

Bulkheads
Timber Bulkheads, 1144
Wharf Bulkhead Behavior at Fulton Terminal 6, 430

Bulking
Activated Sludge-Chlorine Reactions During Bulking Control, 136

Buoyant jets
Flow of a Surface Buoyant Jet in a Cross Flow, 519
Initial Dilution of Horizontal Jet in Crossflow, 503
Two-Dimensional Buoyant Jets in Two-Layer Ambient Fluid, 523

Buried pipes
Behavior and Design of Buried Very Flexible Plastic Pipes, 865
Buried Concrete Pipe Trench Installation Analysis, 856
